

CERTIFIED CHIEF INFORMATION SECURITY OFFICER

CCISO | COURSE CODE: SEC-320

COURSE DETAILS

Intrinsec's Certified Chief Information Security Officer (CCISO) training program brings together all the components required for C-level positions. Professionals who register for CCISO will analyze a combination of topics—audit management, governance, IS controls, human capital management, strategic program development and more—from EC-Council's five identified information security management domains, all of which were created by established Chief Information Security Officers.

Additionally, Intrinsec's CCISO training will directly help students interested in writing the CCISO certificate exam issued by EC-Council.

CCISO is an industry-leading cyber security program that recognizes the real-world experience necessary to succeed at the highest executive levels of information security. Essentially, CCISO aims to bridge the gap between the executive management knowledge that CISO's need and the technical knowledge many aspiring CISO's have.

COURSE BREAKDOWN

Intrinsec's CCISO training and course material focuses on the five examination domains within the CCISO certification. For more information on these domains, along with additional course details, please visit Intrinsec's [CCISO website page](#).
