

CERTIFICATE OF CLOUD SECURITY KNOWLEDGE PLUS

CCSK PLUS | COURSE CODE: SEC-304

COURSE DETAILS

The CCSK training program is often the first choice for professionals who are interested in validating their overall competencies in cloud security and gaining a better understanding of the security factors that are commonly associated with cloud computing. Intrinsec's CCSK training will help you accomplish all of this and more.

Intrinsec's 2-day CCSK Foundation class will help you successfully prepare for the CCSK exam. Over the first two days of the class, our authorized instructor will guide you through the official courseware developed by the Cloud Security Alliance (CSA). The courseware covers all major domains in the CSA Security Guidance for Critical Areas of Focus in Cloud Computing document as well as the ENISA whitepaper. On the final day of the class, you will reinforce what you have learned from the courseware with practical hands-on labs. You also receive lifetime access to several exclusive self-paced resources, allowing you to continue studying online at any time or place.

COURSE BREAKDOWN

This class will review the key topics found on the most up to date version of the CCSK exam (Version 4). These topics include all the major domains from the updated CSA Security Guidance for Critical Areas of Focus in Cloud Computing and the ENISA whitepaper.

DOMAIN 1	Introduction and Cloud Architectures	DOMAIN 4	Data Security for Cloud Computing
DOMAIN 2	Infrastructure Security for Cloud Computing	DOMAIN 5	Securing Cloud Applications and Users
DOMAIN 3	Managing Cloud Computing Security & Risk	DOMAIN 6	Cloud Security Operations
