

COMPUTER HACKING FORENSIC INVESTIGATOR

CHFI | COURSE CODE: SEC-313

COURSE DETAILS

35
CPE CREDITS

5
DAYS

Developed for the IT professional involved with computer forensics and evidence analysis, Computer Hacking Forensics Investigator (CHFI) is a vendor-neutral training program that enables students to acquire necessary hands-on experience with various forensic investigation techniques and standard forensic tools to successfully carry out a computer forensic investigation.

The training exercises and provided course material for this official EC-Council class will teach students the necessary skill set for identification of intruder's footprints and gathering necessary evidence for its prosecution. The major tools and theories used by the cyber forensic industry are covered in the curriculum. Additionally, this course will also help students successfully prepare for the CHFI exam.

COURSE BREAKDOWN

This official EC-Council training seminar reviews all 14 comprehensive modules that were created by EC-Council for CHFI v9, ensuring our students successfully prepare for the CHFI v9 certification exam while also enhancing their overall competencies in computer forensics.

DOMAIN 1	Computer Forensics in Today's World	DOMAIN 8	Investigating Web Attacks
