

CERTIFIED INFORMATION SECURITY MANAGER

CISM | COURSE CODE: SEC-322

COURSE DETAILS

The CISM training program is an intensive four-day review program to prepare individuals who are planning to sit for the Certified Information Security Manager (CISM) exam issued by ISACA. CISM students will focus on the key exam topics covered in the CISM Review Manual 15th Edition and participate in class lectures, group discussions/activities, exam practice and answer debriefs. The course is intended for individuals with familiarity with and experience in information security management.

This course is packed with study tips and practical information, making it a great resource for the student who is planning to sit for the CISM certification exam. Aside from helping students prepare for the CISM exam, this course will directly help those aspiring to become managers or key figures in the information security industry. For instance, students who attend this course can expect to develop a core fundamental understanding of information security as a whole, along with the relationship between information security programs and broader business goals or objectives.

COURSE BREAKDOWN

This official CISM training seminar has a total of six primary sections. All six sections will collectively help you prepare for the CISM certification exam while also enhance your overall competencies in information security management. The six primary sections you will cover are the following:
