

CERTIFIED INFORMATION SYSTEMS SECURITY PROFESSIONAL (ARCHITECTURE)

CISSP-ISSAP | COURSE CODE: SEC-308A

COURSE DETAILS

CISSP-ISSAP is a recognized credential recognizing advanced expertise in the area of information security architecture. This official training seminar provides students with a comprehensive review of information security concepts and industry best practices, mainly focusing on designing security solutions and providing management with risk-based guidance to meet organizational needs. Whether a student is hoping to take the CISSP-ISSAP certification exam or learn more about information architecture, this course is packed with study tips and practical information. All that to be said, CISSP-ISSAP is a great resource for those hoping to review and refresh their information security knowledge while also identifying areas they need to study before writing the certification exam.

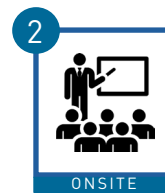

COURSE BREAKDOWN

Students registered for the CISSP-ISSAP course will spend 5 days reviewing all six domains within the CISSP-ISSAP common body of knowledge. These are the topics students can expect to learn in the course:

DOMAIN 1	Access Control Systems and Methodology	DOMAIN 4	Security Architecture Analysis
DOMAIN 2	Communications and Network Security	DOMAIN 5	Technology Related BCP and DRP
DOMAIN 3	Cryptography	DOMAIN 6	Physical Security Considerations
