

# CERTIFIED INFORMATION SYSTEMS SECURITY PROFESSIONAL (ENGINEERING)

CISSP-ISSEP | COURSE CODE: SEC-308E

## COURSE DETAILS

The CISSP-ISSEP concentration was developed in conjunction with the U.S. National Security Agency (NSA) providing an invaluable tool for any systems security engineering professional. As a result, CISSP-ISSEP is recognized as a great credential for those who specialize in the practical application of systems engineering principles and processes to develop a secure system.

Whether a professional is interested in writing the CISSP-ISSEP certification exam or learning about systems security engineering, this course provides a review of information security concepts and practices while helping students identify areas they need to study before writing the exam.

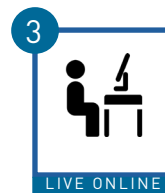

## COURSE BREAKDOWN

Students registered for the CISSP-ISSEP course will spend 5 days reviewing all four domains within the CISSP-ISSEP common body of knowledge. These are the topics students can expect to learn in the course:

DOMAIN 1	Systems Security Engineering	DOMAIN 3	Technical Management
DOMAIN 2	Certification and Accreditation / Risk Management Framework	DOMAIN 4	U.S. Government Information Assurance Related Policies and Issuances

**THREE** DIFFERENT WAYS FOR YOU TO **ATTEND** OUR NEXT TRAINING SESSION
