

CERTIFIED NETWORK DEFENDER

CND | COURSE CODE: SEC-321

COURSE DETAILS

Intrinsec's official CND training program is a vendor-neutral network security certification prep course authorized by CompTIA. CND is a skills-based, lab intensive course based on a job-task analysis and cybersecurity education framework presented by the National Initiative for Cybersecurity Education (NICE). This official EC-Council course has also been mapped to global job roles and responsibilities and the Department of Defense (DoD) job roles for system/network administrators.

The training exercises and class material prepares students on network security technologies and operations to attain Defense-in-Depth network security preparedness. It covers the protect, detect and respond approach to network security. Additionally, the hands-on labs included with our CND training is based on network security tools and techniques which provide real expertise on current network security technologies and operations.

COURSE BREAKDOWN

This official EC-Council training seminar reviews all 14 comprehensive modules that were created by EC-Council for CND, ensuring our students successfully prepare for the CND certification exam while also enhancing their overall competencies in network security.

DOMAIN 1	Computer Network and Defense Fundamentals	DOMAIN 8	Secure IDS Configuration and Management
DOMAIN 2	Network Security Threats, Vulnerabilities and Attacks	DOMAIN 9	Secure VPN Configuration and Management
DOMAIN 3	Network Security Controls, Protocols, and Devices	DOMAIN 10	Wireless Network Defense
DOMAIN 4	Network Security Policy Design and Implementation	DOMAIN 11	Network Traffic Monitoring and Analysis
DOMAIN 5	Physical Security	DOMAIN 12	Network Risk and Vulnerability Management
DOMAIN 6	Host Security	DOMAIN 13	Data Backup and Recovery
DOMAIN 7	Secure Firewall Configuration and Management	DOMAIN 14	Network Incident Response and Management

COURSE FEATURES

Professionals who register for Intrinsec's CND course are provided with an unmatched number of benefits designed to maximize their cyber security training experience. The following features are included with all CND registrations:

- 5 Days of CND Training from an Authorized EC-Council Instructor
- Official EC-Council CND Training Courseware
- Official EC-Council CND Training Lab Manual
- Official EC-Council CND Tools
- 6 Months of Online Access to iLabs for CND (online labs)
- 6 Months of Online Access to CND Test Prep Program
- CND Certification Exam Voucher

INTENDED AUDIENCE

The intended audience for our CND training program is an IT professional who is focused on network operations, specifically those who work with network security technologies and operations. CND is generally a great fit for those working in roles such as, but not limited to:

- Network Administrators
- Network Security Administrators
- Network Security Engineers
- Network Defense Technicians
- CND Analyst
- Security Analyst
- Security Operator
- Anyone involved with network operations
