

CERTIFIED IN RISK AND INFORMATION SYSTEMS CONTROL

CRISC | COURSE CODE: SEC-325

COURSE DETAILS

Certified in Risk and Information Systems Control (CRISC) was developed by ISACA so students could enhance their understanding of the impact of IT risk and identify how it relates to their organization. This CRISC training will provide students with a comprehensive review of the unique challenges surrounding IT and enterprise risk management. Needless to say, CRISC is typically a great choice for those interested in establishing a common perspective and language about IT risk that can set the standard for their own enterprise.

Additionally, this course will help students refresh their information security knowledge and help identify areas they need to study for the CRISC certification exam issued by ISACA.

COURSE BREAKDOWN

This official CRISC training seminar has a total of seven primary sections. All seven sections will collectively help you prepare for the CRISC certification exam while also enhancing your overall competencies in IT and enterprise risk management. The seven primary sections of this class are the following:

DOMAIN 1 IT Risk Identification

DOMAIN 3 Risk Response and Mitigation

DOMAIN 2 IT Risk Assessment

DOMAIN 4 Risk and Control Monitoring and Reporting
