

CLOUD SECURITY BOOTCAMP FOR CANADIAN GOVERNMENT

COURSE CODE: SEC-333

COURSE DETAILS

Intrinsec's Cloud Security BootCamp for Canadian Government training combines the CCSK PLUS class with Intrinsec's Cloud Security Fundamentals for Canadian Government training providing a Canadian Government training experience that is second-to-none.

The first class in the Cloud Security BootCamp for Canadian Government is CCSK PLUS. Over a period of 3-days, you will cover the official CCSK courseware and participate in labs to reinforce your understanding of key course concepts and practices. The final 2-days focus on the Cloud Security Fundamentals for Canadian Government class.

In short, our Cloud Security BootCamp for Canadian Government program will instruct you on the various security issues Canadian Governments need to acknowledge when using cloud services, along with the solutions and best practices you can implement for appropriate protection.

COURSE BREAKDOWN

Over a period of 5 days, you will comprehensively review the course material that is covered in our CCSK PLUS and Cloud Security Fundamentals for Canadian Government training programs. More information on both classes can be found below.
