

CLOUD SECURITY BOOTCAMP

COURSE CODE: SEC-306

COURSE DETAILS

The Cloud Security Boot Camp (SEC-306) is an exclusive learning program that combines two of Intrinsec's most popular cloud security classes to provide students with a 5-day cloud security training experience that's truly second-to-none.

The first class in the Cloud Security Boot Camp is CCSK PLUS. Over a period of 3-days (e.g. Monday to Wednesday) you will cover the official CCSK courseware and participate in labs to reinforce your understanding of key course concepts and practices. You will learn about cloud computing and the security aspects to address prior to deployment of any system in a public or private cloud. Cloud Audit and Compliance is the second class reviewed in our Cloud Security Boot Camp. In the final 2-days of your training (e.g. Thursday to Friday) you will review how to properly assess cloud service providers. Additionally, you will also learn to analyze your own organization's internal usage of cloud-based services.

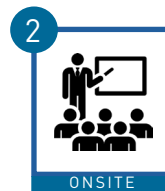

COURSE BREAKDOWN

Over a period of 5 days you will comprehensively review the course material that's covered in two of our most popular cloud security training programs; CCSK PLUS and Cloud Audit and Compliance. More information on both classes can be found below.

DAYS 1-3 CCSK PLUS

DAYS 4-5 Cloud Audit And Compliance

THREE DIFFERENT WAYS FOR YOU TO **ATTEND** OUR NEXT TRAINING SESSION
